

CLMS to Catalyst

Wondering why should you migrate to LRN Catalyst when you already have CLMS?

What sets LRN Catalyst apart is its ability to personalize the platform to suit the branding and customizability of any business.

Although both solutions provide key LMS functionality, there will be several differences and improvements when you migrate. Compliance Learning courses and LRN courses have a better look and feel, more functionality, and a larger selection of courses. In addition, the LRN Catalyst platform has products that were not available on CLMS such as Catalyst Disclosures, Catalyst Design (for editing courses), and Catalyst Reveal (for analytics and benchmarking).

Read on to see a clear comparison of both platforms!
