

To power compliance program growth, you need more than completion data.

Catalyst Reveal provides real-time visibility into your program's performance—powered by learner activity, artificial intelligence, and market benchmarks. Clear KPI dashboards make insights actionable so you can understand and defend your program, all while reducing organizational risk and improving company culture.

Understand program impact.

Quickly understand and advance your program with a single source of truth for compliance reporting and analytics. Our powerful visualizations and flexible dashboards provide a clear view into program performance and surface actionable insights.

Benchmark your success

Put your program's performance into context with benchmarks from companies around the world. This insight into curriculums, learner outcomes, and culture allows you to confidently set your standards and measure success.

Tell a leadership-ready story.

Deliver a data-backed view of program performance with at-a-glance insights into program standing, progress, and contextual benchmarks.

Data that transforms

Increase impact of your code of conduct

Analytics that help you better understand how your employees are using your organization's code of conduct. Get access to data on user visits, search terms, page views, and more, and make better informed business decisions.

Measure company culture

Managing culture begins with effectively measuring it; Access data and insights on how employees perceive and adopt your organizational culture. Gain visibility into pockets of excellence and growth areas critical for your company's success with access to powerful analytics.

Key features:

- Visualizations display data intuitively and eliminate the need to manually manipulate data
- Summary dashboard saves time and makes it easy to share key insights
- Detailed information on course, culture, and learner feedback data
- Visualized insight into key compliance campaign metrics. View all KPIs by specific campaign or as an aggregate.
- KPIs to track and identify E&C program trends
- Data export into CSV or Excel formats
- Course data for comparison across segments like year, business unit, and much more
- Automated reports
- Market-benchmarking across data sets
- Course sentiment based on user population's feedback available in real time

68% of high-performing E&C programs say data on strengths and weaknesses of their culture helps gauge program impact.
